Nursery testing instruments for Water - Soil - Air

ECScanHigh
Rugged easy
to use Waterproof
Conductivity (EC) tester

pHScanWP2
Rugged Waterproof
pH tester with
LOW COST
replaceable pH sensor

Low Cost and
Easy to replace pH /EC
sensors

EC calibration
solution

Current and future sensors

- * Temperature-air
 - * Temperature-soil
 - * Relative Humidity-air
 - * Dew point
 - * pH
 - * Conductivity
 - * Open & close doors
 - * Light (TBA)
 - * Soil moisture (TBA)
- Other sensors are being added.
Please call for details.

MicroLogPlus - monitors conditions in your nursery via radio, from the comfort of your office.

Receive data of Air-Temperature, Relative Humidity, Soil -Temperature, pH and more from the greenhouse directly to your office PC for analysis and record keeping.

Real-time monitoring of conditions in your nursery-data is transmitted via radio from multiple datalogger locations from a distance of up to 400 meters.

The MicroLogPlus will even raise alarm when a breach has occurred. The system will generate an email message (and SMS if available) to alert you of the alarm condition.

Up to 200 dataloggers transmit real-time Temperature, Relative Humidity (additional optional sensors are being introduced) data directly to your office PC from a distance of up to 400meters.
