

Osmoform[®] Topdress plus Hydraflo[®]

Slow Release Fertiliser with Wetting Agent

Twice as good
Introducing a unique combination of Topdress slow release fertiliser and wetting agent in one convenient application

R-1266 OSMOFORM TOPDRESS & HYDRAFLO 20KG

Osmoform[®]

Slow Release Fertiliser

Nutritional Support for Start and Finish

| | | | |
|--------|-------------------|------------------|--------|
| R-1262 | OSMOFORM PREMIX | 3/4 18-2.2-11+TE | 20KG |
| R-1260 | OSMOFORM TOPDRESS | 2/3 19-2.2-11+TE | 20KG |
| R-4001 | OSMOFORM 38N | 2/3 38-0-0 | 22.7KG |

Osmoform is a small homogenous granule of slow release Nitrogen (SRN) plus P, K and all trace elements. The Scotts patented SRN is unique in that the Nitrogen is predominantly released to the plant slowly by microbial activity – not dissolved by water ensuring a more reliable release.

Osmoform is available in two specific formulations. Premix is designed to be incorporated into an unfertilised potting mix for up to 12 weeks as well as 'charging' the mix with all other plant nutrients. Osmoform Topdress is formulated with a faster releasing SRN (8 weeks) for quick green-up of tired plants and will adhere to the soil surface.

Osmocote[®] Exact

Patterned Release Fertiliser

| | | | |
|--------|----------------|-------------------------------|------|
| R-1850 | OSMOCOTE EXACT | 3/4 MINI 16-3.5-9.1+TE | 25KG |
